Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

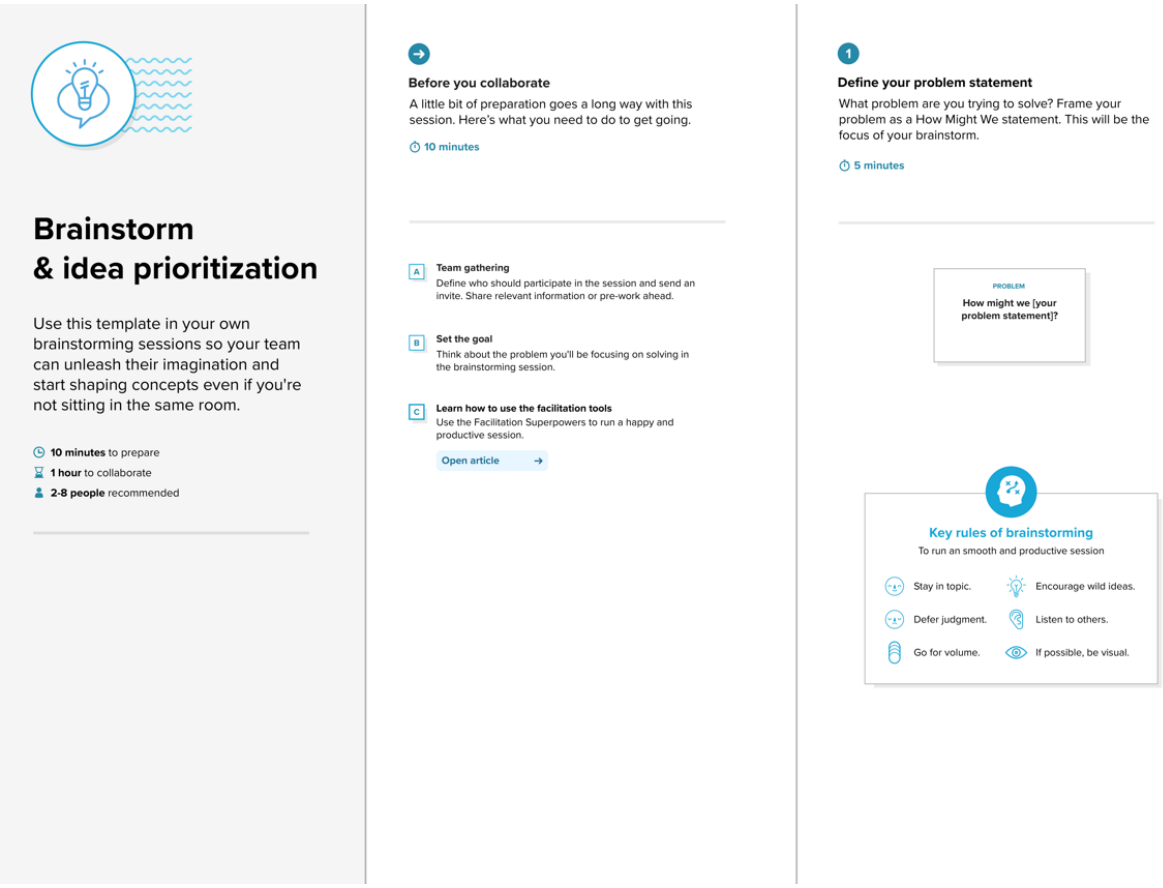
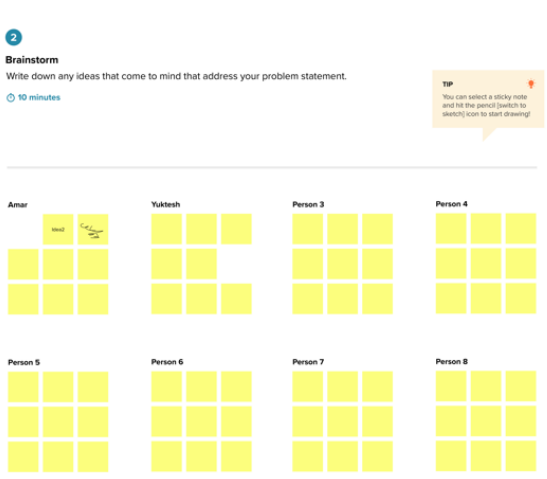
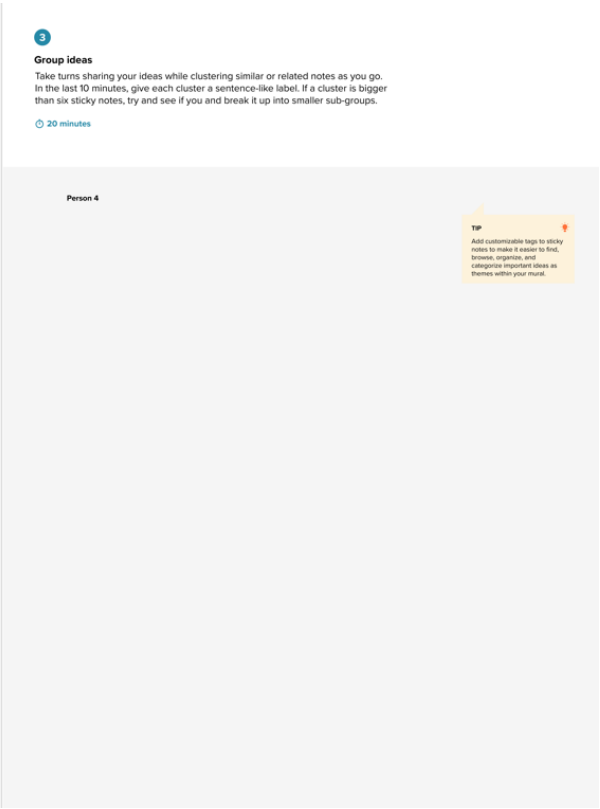
Step-1: Team Gathering, Collaboration and Select the Problem Statement

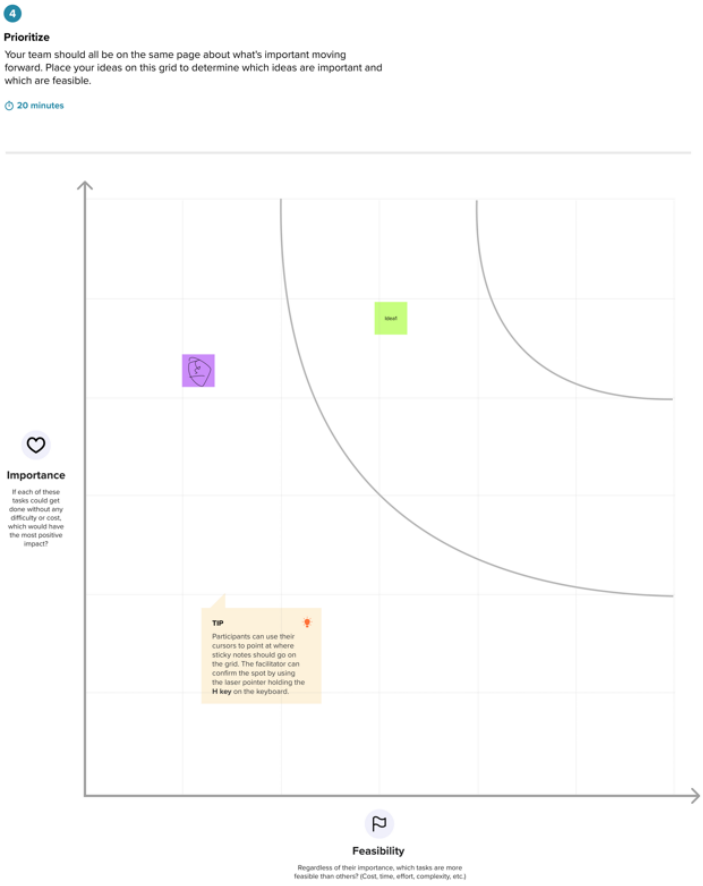


Step-2: Brainstorm, Idea Listing and Grouping





Step-3: Idea Prioritization



Phase 1: Team Gathering & Problem Definition

- **Objective**: To provide a free and open environment that encourages every team member to participate in creative thinking for problem-solving.
- **Focus**: Volume is prioritized over value, welcoming out-of-the-box ideas that participants can build upon to develop a rich amount of creative solutions.
- **Preparation**: Define a specific "How Might We" statement to frame the problem, which serves as the central focus for the entire session.
- **Setup**: Recommended for a team of 2-8 people, requiring approximately 10 minutes of preparation and 1 hour of active collaboration.

Phase 2: Execution & Grouping

- **Brainstorming Rules**: To ensure a smooth session, the team must stay on topic, encourage wild ideas, defer judgment, and remain as visual as possible.
- **Idea Listing**: Participants share their ideas openly to address the defined problem statement.
- **Clustering**: Ideas are organized by taking turns to share while clustering similar or related notes together as the session progresses.
- **Labeling**: Each cluster of ideas is given a sentence-like label to clearly define the concept group.

Phase 3: Idea Prioritization

- **Alignment**: The team works to get on the same page regarding what is most important for the project moving forward.
- **Prioritization Grid**: Ideas are placed on a specialized grid to evaluate them based on two key metrics.
    - **Importance**: Determining how critical the idea is to the project's success.
    - **Feasibility**: Assessing how realistic or possible it is to implement the idea with available resources.
- **Goal**: This process identifies which ideas are high-value and technically achievable to move into the development phase.
